

CONSTRUCTION JOINTS DETAIL

EXISTING TRANSVERSE SECTION

Portion to be removed per Item 202

NOTE

**ALIGNMENT AND PROFILE:** The work done in the project will not change the existing alignment of the structures. The profile of the proposed surface will be similar to the existing pavement, except it be lowered by 1/4 inch.

**407 TACK COAT:** The rate of application of 407 Tack Coat shall be subject to adjustment, as directed by the Engineer. Plan quantities indicate an average application rate of .075 gallons per square yard of Tack Coat for estimating purposes only.

**NEW REINFORCING STEEL AND DOWEL BARS** Shall be epoxy coated.

PROPOSED TRANSVERSE SECTION

**REL** RICHLAND ENGINEERING LIMITED  
MANSFIELD, OHIO
